Experience

Full Stack Engineer

Deel

February 2026 – Present

Remote

- Working within a domain-driven Go backend, building features that manage device assignments, contracts, and procurement workflows across global enterprise customers.
- Engineered warehouse operations tooling that reduced manual workflows for logistics teams, building end-to-end from PostgreSQL migrations, Fiber API and React admin panels.

Associate Lead Engineer - Full Stack

AirFi Aviation

March 2022 – January 2026

Bengaluru

- Architected a high-scale voucher system generating **10M+** voucher codes per month for use across **1000+ flights**.
- Migrated legacy AngularJS modules to React & Next.js, implementing **SSG** to reduce initial load time from **7 to 2.3 seconds**.

Senior Software Engineer

Zigram

April 2021 – Feb 2022

Gurgaon

- Engineered backend consolidation workflows to process **5M+ user profiles**, improving data indexing and query speeds.
- Improved a full-stack expert research platform using Angular 7, Node.js, PostgreSQL, and ElasticSearch.

Systems Engineer

Tata Consultancy Services - R&I

June 2019 – March 2021

Noida

- Built dynamic Angular dashboards for a leading U.S. glass manufacturer, **optimized website initial load time from 8.5 to 2 seconds**.
- Implemented **Jenkins CI/CD** pipelines, reducing build and deployment time from **42 to 7 minutes** using Docker builds and automated scripting.

Mentor & Code Reviewer (Contract)

Udacity

July 2017 – March 2019

Remote

- Mentored over **100 students** on JavaScript, Full Stack, and Cloud Nanodegree programs.
- Delivered live 1:1 sessions, code reviews, debugging support, and conceptual guidance.

Full Stack Developer Intern

Youstart Technologies

May 2018 – July 2018

Jaipur

- Designed a hotel booking application using Angular, Ionic, and Firebase containing **10+ UI Screens**.
- Implemented map-based search feature across 20+ states.

Skills
